

Name	Institution	Poster Title	poster #
Adi Maron-Katz	Tel Aviv University	EXPANDER: A PLATFORM FOR DISSECTING NETWORKS AND FUNCTIONS USING EXPRESSION PROFILES	2
Adva Yeheskel	Tel Aviv University	The Bioinformatics Unit	7
Agnes Toth-Petroczy	Weizmann Institute	Protein insertions and deletions enabled by neutral roaming in sequence space	72
Alexandra Dana	Tel Aviv University	Properties and Determinants of Codon Translation Speed Distributions	55
Alon Diamant	Tel-Aviv University	Three-Dimensional Genomic Organization of Fungal Genes is Strongly Correlated with their Expression and Function	67
Amit Blumberg	Ben Gurion University of the Negev	Identifying novel sequence elements and factors regulating human mtDNA transcription	81
Amos Stern	The Hebrew University of Jerusalem	Design Principles for Local Translation in Neurons	103
anat burkovitz	Bar Ilan University	What Guides Antibody Affinity Maturation?	40
Ariel Afek	Ben Gurion	Genome-Wide Organization of Eukaryotic Preinitiation Complexes	107
Ariel Azia	Bar Ilan University	SeqCHED Predicting Metal Binding Sites in Human Proteins	14
Ariel Feiglin	Bar Ilan University	Predicting the Effect of Drugs - from Molecules to Networks	26
Arnon Mazza	Tel Aviv University	A Minimum-Labeling Approach for Reconstructing Protein Networks across Multiple Conditions	27
Asaf Madi	Weizmann	The mouse T-cell receptor repertoire includes a set of public CDR3 sequences that are abundant, shared by diverse MHC haplotypes and enriched with autoimmune-related specificities	51
Asaf Peer	HUJI	Evolutionary patterns of regulatory small RNAs and their targets	75

Asaf Zviran	Weizmann Institute of Science	Deterministic direct reprogramming of somatic cells to pluripotency . In this poster we will present a new deterministic and synchronized iPSC reprogramming. The accelerated reprogramming dynamics is quantitate using time-lapse fluorescent microscopy and modeled using Phase-Type (PH) modeling. Additionally, genetic and epigenetic reprogramming dynamics is measured and analyzed.	111
Avi Ben-Shimon	Hebrew university	Towards a fully flexible anchor-driven peptide docking approach	4
Avital Brodt	Tel Aviv University	DeQTL: Exploiting Time-Series Data to Enhance QTL Analysis	60
Aya Narunsky	Tel Aviv University	ConFind: Exploiting the protein databank to propose additional conformations of a query protein of known structure	36
Ayana Dagan Wiener	The Hebrew University	BitterDB – bitter compounds database and predicted bitterness of drugs	15
Beery Yaakov	Ben Gurion University	Active MITES in Wheat	64
Bilal Salih	University of Haifa, Israel	STRONG NUCLEOSOMES WITH VISIBLE, RATHER THAN HIDDEN SEQUENCE PERIODICITY	109
Binyamin A. Knisbacher	Bar Ilan University	Large-scale screen for DNA editing in retrotransposons of diverse genomes	74
Chen Yanover	IBM Research, BGU	The preeminence of redundancy-weighted datasets	41
Dan Bar Yaacov	Ben Gurion University of the Negev	The chameleon transcriptome: comparative genomics analysis of the OXPHOS system revealed loss of COX 8 in Lizards	65
Dan Ofer	Hebrew University of Jerusalem	A Genome Scale Computational Approach for Identifying Neuropeptides	61
Daniel Zaidman	Tel-Aviv University	Greedy Mutations Peptide Design Algorithm	46
David Amar	Tel-Aviv University	Algorithms for mapping modules in pairs of biological networks	21

David Golan	Tel Aviv University	Using State Machines to Model the Ion Torrent Sequencing Process and Improve Read Error-Rates	54
David van Dijk	Weizmann	Inferring mechanisms of combinatorial regulation from thousands of dose-response curves of designed promoters	87
Dikla Kolan	Bar Ilan University	Normal Mode Dynamics Reveal the GPCR Activation	48
Dr. Stas Engel	Ben Gurion University in the Negev	“Stability patches” on protein surfaces - structural organization and functional role	22
Dvir Netanely	Tel-Aviv University	Identification of Breast Cancer Subtypes Using RNA-Seq Data	85
Edward Vitkin	Technion	Computational modeling of two-step bioethanol production: Marine macroalgae <i>Ulva</i> sp. study	113
Efrat Kligun	Technion	Conformational Readout of RNA by Proteins and Small Ligands	47
Eitan Lavi	Hebrew University	A novel ALU-mediated mechanism to enrich protein repertoire	97
Eshel Orly	ARO	Detection of genes and microRNA involved in sex determination in Nile tilapia (<i>Oreochromis niloticus</i>)	86
Evgeny Yurkovsky	Tel-Aviv university	Exploring the boundaries of the pluripotent state using ChIP-seq and RNA-seq	57
Eyal Seroussi	Volcani Center	Applying machine learning to the prediction of breeding values using single nucleotide polymorphisms (SNPs) in a small-sized dairy cattle population.	118
Frida Belinky	Weizmann Institute of Science	Tell me your pathways	20
Gil Eshel	Ben-Gurion University	a preliminary results from my research on the Negev desert plant species <i>Anastatica hierochuntica</i> , comparing its response to abiotic stresses compared to its sensitive and salt tolerance relatives, <i>Arabidopsis thaliana</i> and <i>Thellungiella salsuginea</i> , respectively.	8
Hadas Zur	Tel-Aviv Univeristy	New Universal Rules of Eukaryotic Translation Initiation Fidelity	84

Hagay Enav	Technion	Metagenomic analysis suggests viral induced shift of host metabolism toward nucleotide biosynthesis	76
Hagay Enav	Technion	Metagenomic analysis suggests viral induced shift of host metabolism toward nucleotide biosynthesis	77
Hagit Porath	Bar-Ilan University	Identification of Ultra Edited RNA-Seq Reads in Human and Mouse	91
